

Nikola Jočić

Mobile App Developer

[Email](#) [LinkedIn](#) [Portfolio](#)

After 5 years of building Flutter apps, I've learned that the best products come from developers who treat them like their own. I take pride in owning the entire mobile lifecycle. From the first wireframe to production, and thrive in teams where every feature has a purpose.

Skills

Languages: Dart(Flutter), Java, PHP, JavaScript. Familiar with: Swift and Kotlin

Tools: Firebase(Auth, Firestore, Storage, Functions), Git, Postman, Figma, Stripe, Google Maps

Mobile: Clean architecture, State management (Riverpod, BLoC, Provider), REST

Dev: Agile/Scrum, Code Reviews, Performance Profiling, Unit Testing

Work Experience

Flutter Developer - Tehnicom DOO

2020 - Present | Kruševac - Hybrid

- Worked closely with international clients and small product teams in remote, async environments, delivering fast iterations and tight feedback loops.
- Integrated media-heavy features including image uploads, compression, and optimization.
- Collaborated directly with CTOs, designers and backend engineers to ensure product-market fit.
- Integrated OpenAI APIs for real-time text classification and smart replies.

Full stack Developer - Freelance

2020 - Present | Kruševac

- Led end-to-end development of Android, iOS, and Web apps using Flutter, with full ownership of architecture, release cycles, and performance.
- Integrated Firebase services (Auth, Firestore, Storage, Functions) to power applications.
- Focused on code quality, and performance tuning, improving database query times by 40%.
- Worked fully remote with international clients using English daily.

Projects

Company task and payroll management app – Workly

- Built image upload and preview functionality with Firebase Storage, handling image compression and caching to improve load times.
- Integrated Firestore for real-time product listings and used analytics to boost sales by 60%.
- Implemented full user tracking and behavioral analysis for data-driven product improvements.

Location-Based Task Management App - MapItDone

- Developed mobile app with Flutter and Firebase to handle tasks, payroll and communication.
- Reduced manual payroll processing time from 10+ hours to under 2 hours monthly.
- Integrated Firebase Auth (Email, Google, Apple) for secure authentication.

Education

B.Sc. in Software Engineering – VTTŠ, Kruševac (2017 - 2020)
